Golden Hour

AI-Powered Emergency Care Coordination & Connected Healthcare Platform

- **Industry / Domain** : HealthTech • Emergency Response • B2B/B2G SaaS
- **Target Market** : 50,000+ Rural/Semi-Urban PHCs & 70,000+ Private Hospitals
- **Core Innovation** : Multilingual Voice AI Triage, Live Telemetry & ABDM Sync
- **Product Stage** : Fully Functional MVP (Android APK + Cloud Telemetry Engine)
- **Founder & Lead** : Akshat Srivastava (Founder & Lead Developer)
- **Team Name** : Life Line Coders
- **Key Deliverables** : Working APK | Demo Video | User Manual | GitHub Code

Golden Hour

SMART INDIA HACKATHON 2026

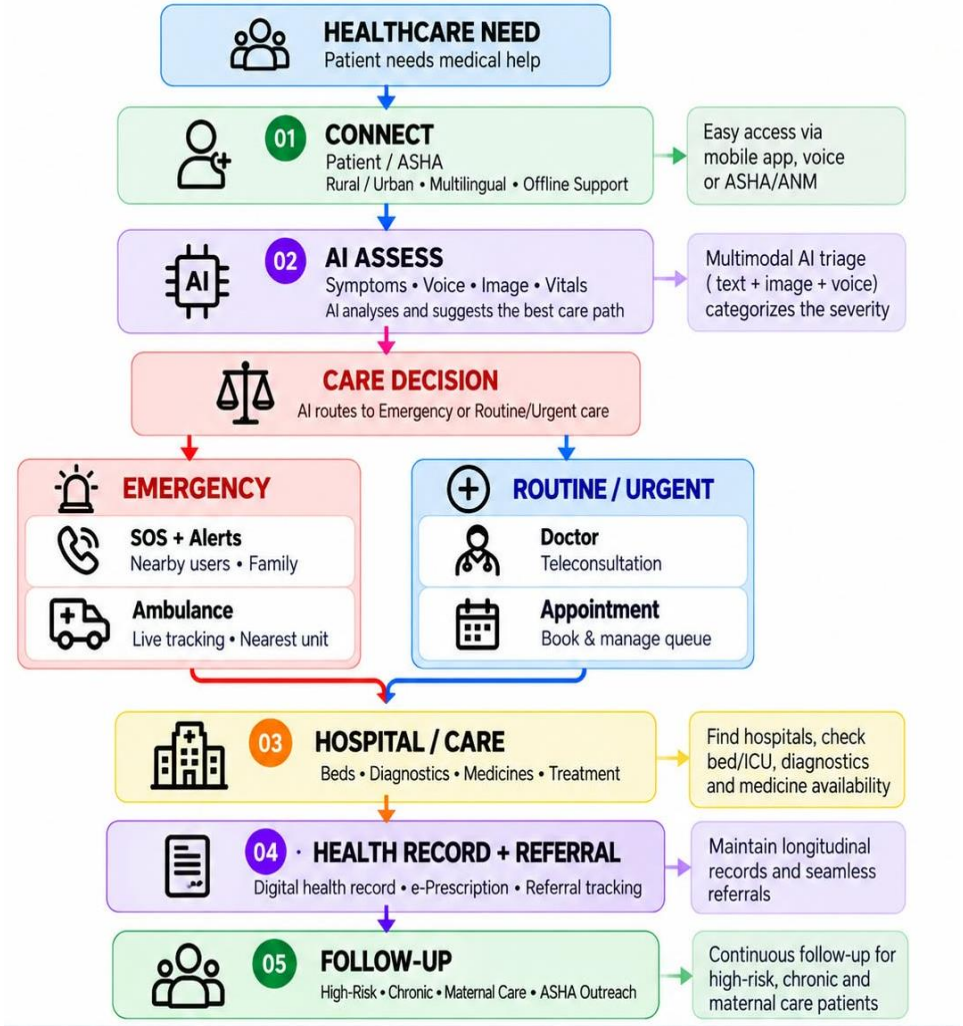
Proposed Solution

THE PROBLEM

- Long travel to healthcare facilities
- Shortage of specialists
- Fragmented patient information
- Delayed referrals & follow-up
- Limited emergency coordination
- Poor visibility of healthcare resources
- Connectivity & language barriers

Patients often move between healthcare services without one connected care journey.

GOLDEN HOUR: The Complete Care Solution



INNOVATION & UNIQUENESS

✓ **AI-Assisted Triage**
Routes healthcare needs into emergency, routine or urgent pathways.

✓ **Emergency Coordination**
Nearby alerts, emergency contacts, ambulance & hospital coordination.

✓ **Multi-Role Ecosystem**
Patient • Doctor • Hospital • Ambulance • ASHA/ANM.

✓ **Continuity of Care**
Health Record → Referral → Follow-up.

✓ **Healthcare Access Layer**
Appointments • Queue • Teleconsultation • Diagnostics • Medicine Visibility.

✓ **Inclusive Architecture**
Multilingual • Low-connectivity • Interoperability direction.

Golden Hour doesn't just respond to emergencies — **it connects the complete healthcare journey.**

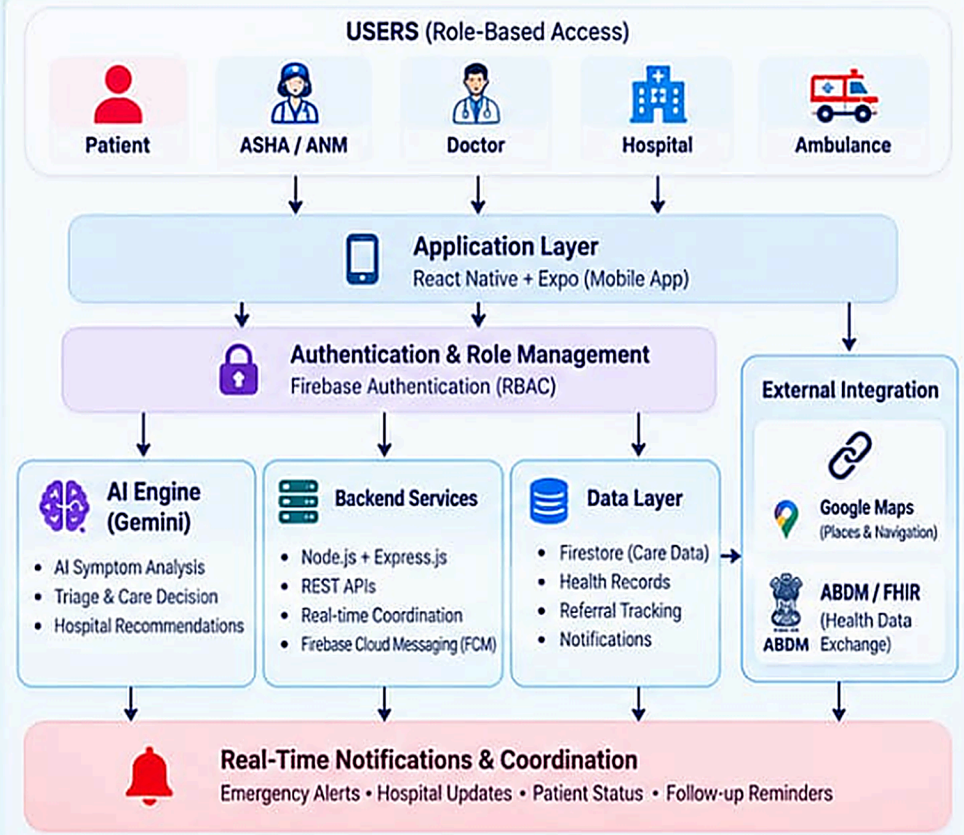
TECHNICAL APPROACH

SMART INDIA HACKATHON 2026

TECHNOLOGY STACK

- **React Native + Expo** — Cross-platform mobile app
- **Node.js + Express.js** — Backend & APIs
- **Firebase (Auth, Firestore, FCM)** — Authentication, Database & Notifications
- **Gemini AI** — AI-powered triage & insights
- **Google Maps & Places API** — Hospital search, navigation & live location
- **FHIR / ABDM Standards** — Health data interoperability
- **Cloud Deployment (Render)** — Scalable & reliable hosting

SYSTEM ARCHITECTURE



WORKING PROTOTYPE (APP SCREENS)

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

TECHNICAL FEASIBILITY

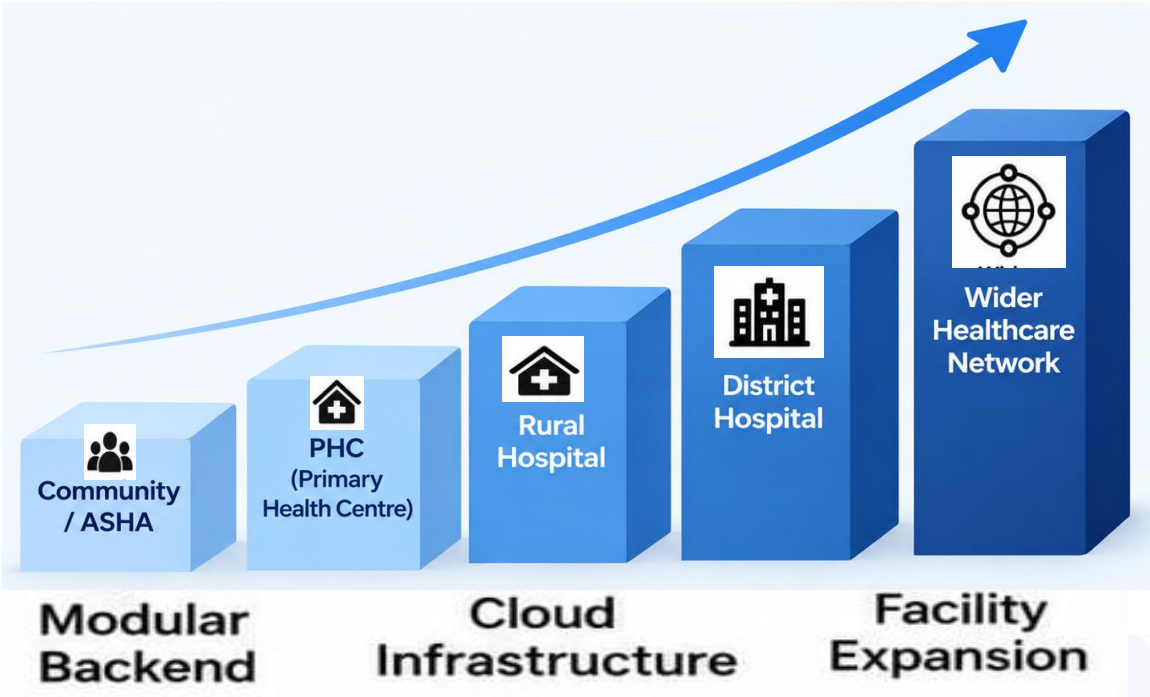
- **Cloud-based Deployment**
  Scalable and reliable infrastructure.
- **Modular & Role-based Architecture**
  Supports multiple user roles and future expansion.
- **API-driven Integration**
  Easy integration with external services.
- **Secure Authentication & Access Control**
  Ensures data privacy and secure usage.
- **AI-assisted Triage with Human Oversight**
  Combines AI efficiency with expert validation.

OPERATIONAL FEASIBILITY

- **Patient-centric Workflow**
  Simple and easy-to-use for all users.
- **Emergency Escalation**
  Faster response during critical situations.
- **Healthcare Coordination**
  Connects patients, hospitals and ambulance.
- **Appointment & Queue Management**
  Reduces waiting time and improves access.
- **Referral & Follow-up**
  Ensures continuous and long-term care.

Scalability & Viability

Designed for phased deployment and long-term growth.



Risk Readiness & Mitigation

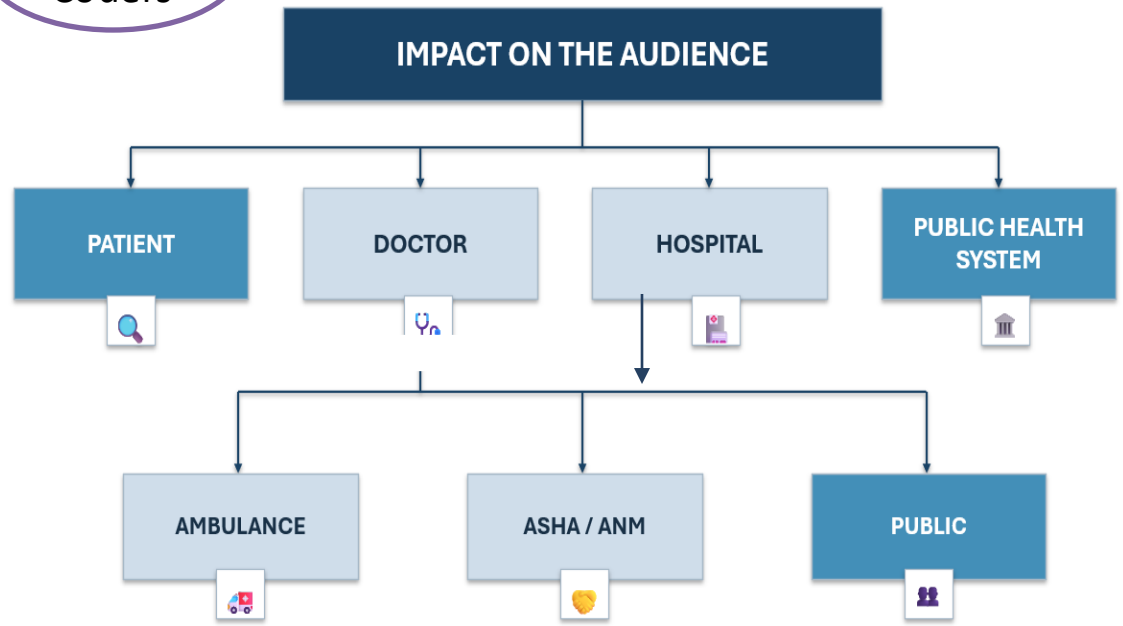
Risk	Mitigation
Poor Connectivity in Rural Areas	Offline data storage and synchronization
GPS Dependency	External navigation support and fallback options
AI-Assisted Decision Errors	Validation and human oversight by healthcare professionals
Notification Delivery Issues	FCM with fallback mechanisms
Sensitive Health Data	Authentication and role-based access control
Low Digital Literacy	Simple, multilingual and easy-to-use interface

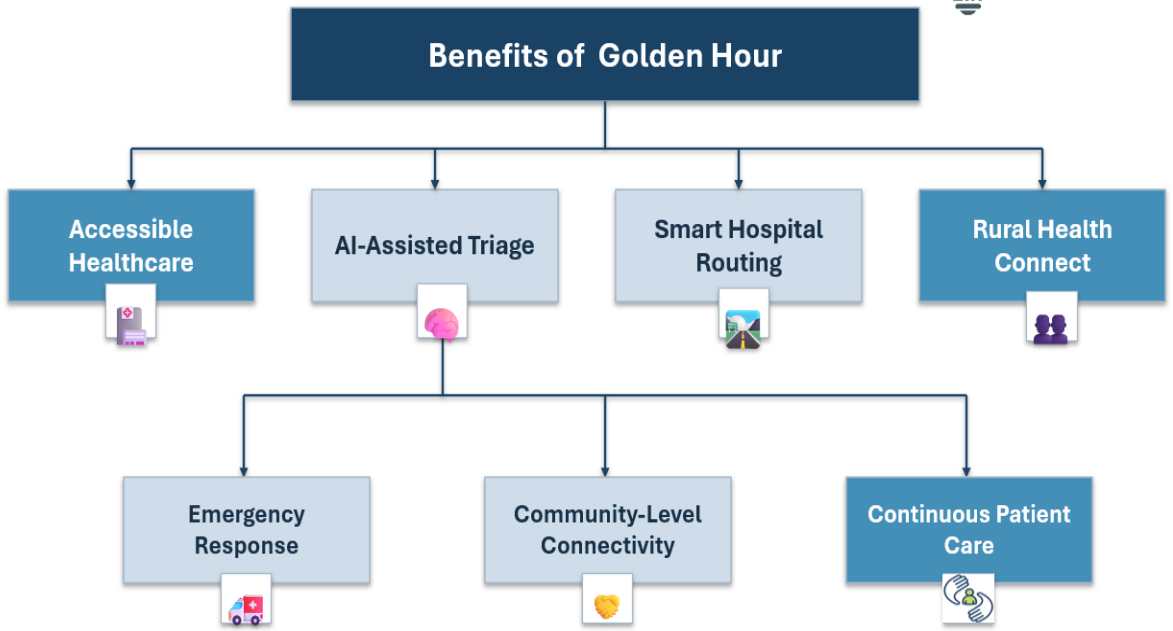
Golden Hour is designed as a modular platform that can evolve from emergency coordination into a broader public-health access ecosystem.

Life Line Coders

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2026





✦ IMPACT ON THE AUDIENCE

Patient — Faster healthcare access; nearby emergency alerts; emergency-contact alerts; emergency & hospital coordination; doctor/appointment access

Doctor — Better patient information; appointment / queue visibility; referral coordination; digital consultation support.

Hospital — Incoming emergency coordination; patient / referral visibility; diagnostic coordination; medicine / resource visibility.

Ambulance — Emergency assignment; patient pickup information; destination visibility; trip status.

ASHA / ANM — Community healthcare support; access assistance; follow-up support; low-connectivity workflow.

Public Health System — Coordination across facilities; referral visibility; continuity of care; digital workflows; scalable healthcare ecosystem.

✦ BENEFITS OF THE SOLUTION

Social — Better healthcare access and coordinated emergency response across patients, frontline workers, doctors, hospitals and emergency services.

Emergency — Nearby alerts, emergency-contact alerts, ambulance and hospital coordination.

Operational — Connected provider workflows for appointments, queues, referrals and emergency coordination.

Continuity — Health Record → Referral → Follow-up after treatment.

Access — Provider discovery, doctor / appointment access and broader healthcare access modules.

Scalability — Community → PHC → Rural → District → wider healthcare network.

From emergency response to continuity of care, Golden Hour connects the people and services involved in a patient's healthcare journey.
